

## Road Map to Your HIV Epidemic Profile

This profile falls into several sections. These sections are presented in order of increased complexity of both information and analysis. Here is a summary of what you will find in your binder.

**Introduction to the Texas HIV Epidemic Profiles** – Provides information on how the profiles are organized and how the analysis was performed.

**Planning Area Profile** – Short summary of our analysis of your planning area's morbidity and risk profiles.

**This may be as far as you want to go.**

You may not want any more details. But if you do....

**Discussion of Risk Populations** -- If you would like details on the morbidity and risk factors for each population, consult this section.

**Appendix 1. Morbidity Data** -- This appendix contains rates and number of cases for each morbidity factor used in this profile. Rates and cases are provided for the general population, and broken-down by behavioral category, sex, and race/ethnicity category.

**Appendix 2. Risk Data** -- This appendix contains information on the proportion of prevention counseling clients who disclosed engaging in a specific risk in the past year. Risk information is provided as proportions of the general population and broken-down by behavioral category, sex, and race/ethnicity category.

**Appendix 3. Calculating Population Size** -- This section details how the sizes of the subpopulations were estimated.
